

## Live Q&A - Shape Based Tools - 4th May, 2023

Question	Answer
I often use the vertical Guides as a reference for the Keystone tool. But when the keystone tool is used/active the guides can't be moved at the same time	Hi Pietro! Please, share this point on our new 'Improve Capture One' page: <a href="https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One?sort_by=votes">https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One?sort_by=votes</a> Thank you ;)
How could I get or make lens profiles that are not listed in C1?	Hi again Pekka! Please, check this article where you will find all the information about how to work with unlisted lenses in Capture One: <a href="https://support.captureone.com/hc/en-us/articles/360002657537-Working-with-an-unlisted-lens-profile">https://support.captureone.com/hc/en-us/articles/360002657537-Working-with-an-unlisted-lens-profile</a> Thanks Marian!
Hi! Any chance to add a loupe to the Keystone tool in the near future?	Hi Michal! That's a good point, please, share your ideas on our new Feature Request page: <a href="https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One?sort_by=votes">https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One?sort_by=votes</a>
How do we get the default export presets back if I deleted them	Right click on the + in the Export Recipes tool
Unfortunately i entered a littel later, is the presentation afterwards accessible?  	Hi Juan! Yes, this webinar will be available on youtube in a couple of days.
How does the Lens Correction - Movement work?	Hi Pekka! As David just explained it is for technical cameras
Is it possible to show rulers in C1?	Hi Pekka, only guides and grid are available, but this is actually a good point, please, share this idea on our "Improve Capture One Page" : <a href="https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One?sort_by=votes">https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One?sort_by=votes</a> Thanks. I'll do that!
can we do a non-centered vignette without using a circular mask ?	Hi Rafael! In order to get a non-centered vignette, you will need the radial mask. You can check this tutorial: <a href="https://www.youtube.com/watch?v=8Kp_JbslsQ8">https://www.youtube.com/watch?v=8Kp_JbslsQ8</a>
How can we create an edit short cut that makes unconstrained the default opening parameter for crop tool instead of original?	Hey! I guess you can try the following: If you wish the crop ratio to be global instead, this can be set in Preferences > Crop > Behavior > Use global aspect ratio. And choose the one you wish to have a default one, like Unconstrained. I just tried it, it works for unconstrained but not for crop outside image! ? It might be not saved as a part of Crop settings, but that would be a nice addition to have.
How do you set 'unconstrained' as default?	If you wish the crop ratio to be global instead, this can be set in Preferences > Crop > Behavior > Use global aspect ratio and make sure it is Unconstrained.
Regarding crop, using my Fujifilm X camera in an aspect ratio other than 3:2, why doesn't Capture One display that ratio with the RAW photos?	Hi Leon, we import a "clean" RAW, so any adjustments done in-camera, like a specific crop, would be discarded. So all the time and effort I'm spending getting my cropping in camera right, Capture One discards. I believe CO is the only DAW that discards this information. Very unfortunate. True that. Might be something we can add in future updates. You're welcome to share your ideas on our Improve Capture One page if you like: <a href="https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One">https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One</a> Thanks Victor. This idea has been requested to CO for years. No changes though. I guess it couldn't hurt to bring it up again. Hi Leon, I'd just add that now other users can vote for the idea to push it forward and the page is monitored by R&D, so it's really worth sharing. Thanks Helen (and Victor). I'll post the request again in the new format.
Is it possible to crop outside the image area?	Hi Josh. check this guide: <a href="https://support.captureone.com/hc/en-us/articles/360002583117-Cropping-outside-the-image-area">https://support.captureone.com/hc/en-us/articles/360002583117-Cropping-outside-the-image-area</a>
Is there any way to get Capture One to prefer big round numbers? I'm very anal and spend huge amounts of time moving between (for instance) 1001 and 999 to finally get 1000 pixels as one dimension. (Or to get 1.0 or .5 or whatever in sliders. It wears me out!	Hi Jonathan! If you are cropping to specific outputs, then use the method that David showed in the broadcast.
Is there some place where Capture One will display the size of the image in megapixels?	Currently, Capture One doesn't display that - only the pixel resolution like 1280x720 in the Metadata tool.

Question	Answer
can it be used on portraits?	Hi Asya, usually it is used by architecture photographers that need to correct the perspective distortion of buildings. for example, so it depends on the result you wish to achieve. Theoretically, you can use it on any image, but if you share the idea you have on your mind, we might provide you with a more correct answer.
