

What's new in Capture One? - 10th March, 2023

Question	Answer
can you download a preview image from capture one live?	Hi Luca! No, it is not possible. Only rating, color tagging, and adding comments are allowed in Capture One Live.
Cull view with grouping would be awesome for adding keywords, but it doesn't seem possible?	Hi Peter, yeah, keywords are not yet there, but we'd appreciate if you could share that feature request here: https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One
When will the live view on the iPad applied	Hi, we aren't able to provide you with such info right now, but we'd appreciate if you could share this Feature Request on the page David has just shown: https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One
Can C1 Live comments be passed back to C1??	Comments are only viewable in a Capture One Live Session.
Hi from Colorado to Helen, thanks for the new features!	Hello hello! Thanks for warm words and for joining us today:)
I tried to sign up for the other webinars that were mentioned in the email invitation but the links didn't seem to work?	Hi Antonia, try to reserve the spot from here: https://support.captureone.com/hc/en-us/sections/8039133642141-Livestreams
Will Capture One get a quick "Select Subject" feature?	Hi Oscar, we don't have such info right now, but we've implemented a new way to share feature requests to make the process simpler and more intuitive. You're very welcomed to share your ideas on this page: https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One Please make sure you've read the guide first. Thank you!
How do we import and adjust the HEIF files	Hi Joe, same way you work with RAW files. Note: the support is provided for Apple HEIC and other photos converted to 8-bit HEIF to the extent that those are supported by the underlying operating system. thank You
How do you make the iPhone squirt out a DNG file?	Hi Jonathan, there should be an internal setting to adjust on your iPhone. OK. I see it now. Camera > Formats > Apple ProRAW.
Do this work with dji drone as well ?	Hi Thomas, if it supports the new DNG standard and the drone itself is supported, that should be possible.
Is the latest version of Capture One "compatible" with macOS Ventura	Yes, it is. For more details see: https://support.captureone.com/hc/en-us/articles/360002466277-Capture-One-system-requirements-and-OS-support
how do you show the base characteristics panel?	Hi David, if you miss it, right-click next to any tool tab -> Add Tool -> Vase Characteristics. If you want to make it a floating one, just drag it and that's it.
can you create a keyboard shortcut to move background adj?	Yes, you can. It's in the Layer section -> Move Background Adjustments to New Layer.
I am a photojournalist and want to blur parts of pictures (for example number plates). I have used multiple layers with dehaze but its not very good is there a better way?	Hi Gilbert, blur tool can be a good add-in, agree. We'd appreciate if you could share your suggestion here: https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One
Is smart adjustments just white balance and exposure? Any other ones?	Hi Janelle, yeah, currently only those two can be adjusted. Ok. Thanks!
Can you change the import auto adjust, mine gives negative shadows when it should be positive? How do I see Helen's reply	Hi Gilbert, I'm here for you. Would be nice to investigate this. Could you submit a request at support.captureone.com please? Attach a screen recording of the issue and our support team will help you to figure out what's wrong.
Will the magic brush ever let you select a subject instead of the color range?	Hi Lisa, Magic Brush is implemented in order to mask areas faster based on colors and tones faster. What you're asking for, should be a separate tool. You're very welcome to request it here: https://support.captureone.com/hc/en-us/community/topics/6431248131613-Improve-Capture-One Thank you!
Are smart adjustments placed onto a separate layer?	they're applied to the background.
can you download a preview image from capture one live?	Hi Luca! No, it is not possible. Only rating, color tagging, and adding comments are allowed in Capture One Live.
In Base Characteristics why does the engine show Capture One 20/21 and not 23	Hi Philip! It is because the engine is the same.
Will not Auto Adjust create the same result ?
